

Rahul Gurav

AI Engineer | Agentic AI, LLM Applications & Workflow Automation

Mumbai, India | +91 9082115286 | rahulgurav866@gmail.com

Portfolio: raul1100.github.io | LinkedIn: linkedin.com/in/rahul-gurav-77a987241 | GitHub: github.com/Raul1100

SUMMARY

AI Engineer building production LLM applications, agentic AI systems and workflow automation for a manufacturing business. Experienced in tool-calling agents, RAG, prompt engineering and multi-step LLM workflows using LangGraph, OpenRouter, Claude, ChatGPT and Gemini, delivered as full-stack apps in Python, TypeScript, React and Node.js, and as n8n automations integrated with REST APIs, Google Workspace and WhatsApp.

EXPERIENCE

AI Engineer

Dec 2025 - Present

Biopapro Cutleries Pvt. Ltd. (BCPL), Mumbai

- Design and ship AI-powered internal software for sales, procurement, production and dispatch teams, from requirements to deployment.
- Built a full-stack AI CRM (React, Node.js, Google OAuth, role-based access) covering lead lifecycle, order-to-dispatch (O2D), SCOT tracking, grievance management, reorder prediction, PDF/Excel reports and an in-app AI assistant.
- Built a 45-node n8n WhatsApp AI agent that handles text, voice notes and images, separates existing customers from new leads, qualifies leads with chat memory, updates the CRM and books meetings, with a human-takeover switch.
- Built an n8n export lead-generation agent that searches B2B buyers by country, enriches contacts (web scraping, email-domain checks, RocketReach) and drafts personalised outreach emails.
- Delivered 40+ Google Apps Script tools for inventory, dispatch, production entry, import purchase and finance, and migrated the CEO dashboard back end from Express to FastAPI.

Nets & Security App Trainee

May 2025 - Oct 2025

Procedit

- Security assessments and backend analysis for enterprise applications; REST API testing with Postman.
- Python scripts for backend automation; research on Hyperledger FireFly and AWS blockchain; technical documentation.

PROJECTS

AI Procurement Agent

- Built a full-stack procurement platform (React, TypeScript, Node.js) with a LangGraph tool-calling agent on OpenRouter, local RAG search and a procurement knowledge graph.
- Agent answers planning, import PO, payment, landed-cost, vendor, reorder-point and lead-time questions in plain English, citing every number back to its source.

AI Social Media Automation (n8n, 179 nodes)

- Multi-agent workflow: an AI strategist plans the week, an AI copywriter drafts posts, generated images are reviewed by an AI art director, and Google Veo creates videos.
- Approval dashboard served from webhooks; publishes to LinkedIn, Instagram, Facebook and WhatsApp, and tracks performance, AI cost and budget with automatic alerts.

FactoIntel: Factory Intelligence Platform

- React, TypeScript and Express platform reading 6 data sources to monitor 5 production processes, labour and machine capacity.
- Day-by-day FG/RM inventory reconciliation that labels the root cause of every negative balance, plus AI anomaly detection and an AI daily brief.

SKILLS

AI & LLM: Agentic AI, Tool Calling, RAG, Prompt Engineering, LLM Workflows, LangGraph, OpenRouter, Claude, ChatGPT, Gemini

Programming: Python, TypeScript, JavaScript, Google Apps Script

Web & Backend: React, Node.js, Express, FastAPI, REST APIs, HTML/CSS, Tailwind CSS

Automation & Tools: n8n, Google Workspace APIs, Google Sheets API, WhatsApp Cloud API, Webhooks, Git, GitHub, Postman, Render

EDUCATION

Master's Degree in Computer Science

2023 - 2025

Bachelor of Business Administration (BBA)

2019 - 2022

N G Acharya and D K Marathe College, Mumbai
